EY

Diversity, inspiration and innovation are key drivers in transforming the delivery of citizen outcomes to benefit society. Every day, civil servants are making this happen. We are proud of our long partnership and support of the Civil Service Awards, which celebrate creativity, best practice and excellence in Government. These prestigious awards reflect EY's purpose, to build a better working world. We do this by creating public value for governments, businesses, citizens and communities, through our five pillars - People, Carbon, Digital, Value and Trust.
